## Rex-Royal S2 CST

With the Rex-Royal S2 CST, you can enhance the way coffee and hot water are created with a bit of barista style. You can froth up the fresh milk yourself using the steam wand, or you can leave this to the optional PowerSteam frother, which takes this on and monitors the temperature for you. That means you can froth up the perfect cappuccino or heat up milk for some other milk speciality like a barista at the push of a button.

With the professional Rex-Royal tea/steam boiler with an hourly hot water output of up to 28, it is possible to make tea and coffee at the same time, even as a double product.

With the Rex-Royal S2 CST, you can experience the classic form of milk preparation in the perfect combination of aesthetics and technology.
