

Rex-Royal S2 MCST

Rex-Royal S2 MCST

Using its efficient Rex-Royal milk system, the S2 MCST makes fresh milk into a fine-pored froth at the push of a button. That means it can combine any milk speciality, such as a cappuccino or latte macchiato, in perfect quality, even as a double product. Additionally, you can froth up the fresh milk yourself using the steam wand, or you can leave it to the optional PowerSteam frother, which takes this on and monitors the temperature for you. That means you can froth up the perfect cappuccino or heat up milk for some other milk speciality like a barista. With the professional Rex-Royal tea/steam boiler, which has an hourly hot water output of up to 28 litres, it is possible to make tea and coffee or other mixed drinks at the same time.

A variety of possible combinations and options such as various compressor fridges, cup warmers, cup dispensers, etc., make it possible for every user to adjust the S2 MCST to meet their requirements. The automatic, HACCP-certified cleaning process guarantees the machine will run in a perfectly hygienic way with minimal time expenditure.

Features

M- Fresh Milk

S- Steam

T- Hot Water

C- Coffee

Advantages

High-quality metal brewing unit

Premium coffee quality thanks to the high-quality, more powerful Rex-Royal metal brewing unit with a capacity of 16 grams of ground coffee per brewing operation
