

Rex-Royal S500 CST

Rex-Royal S500 CST

With the powerful Rex-Royal S500 CST, you expand the CT model (coffee and hot water) with a steam wand. With a generous working width of 45 cm you can control the steam output with the control knob like a barista and as a result manually prepare milk specialties, such as cappuccino and latte macchiato.

With the "PowerSteam" option, place the milk jug with fresh milk under the "PowerSteam" steam lance and the milk is automatically foamed to the correct temperature, with a finely pored consistency. Additionally, the powerful hot water and steam boilers ensure consistent product quality. Cups can be warmed on the heated shelf provided.

Features

S- Steam

T- Hot Water

C- Coffee

Advantages

Simultaneous dispensing of hot water, steam and two coffee products

Possible to simultaneously supply hot water, steam and 2 coffees

Video-capable 10-inch TouchScreen

Intuitive menu navigation thanks to the 10-inch touch screen for the simple and efficient selection of a drink from a range of up to 24 products

Short maintenance times

Modular construction for short intervention and maintenance times for a long-term and secure investment

Temperature monitored automatic foaming

Optional PowerSteam frother to automatically froth up the fresh milk and monitor the temperature

Third grinder optional available

Can be optionally equipped with a third grinder

Add-On units

With options like cup warmers, cup dispensers and mobile solutions, the Rex-Royal coffee machines are perfectly suited to meet your requirements

58 l/h hot water supply

Hot water capacity at a rate of up to 58 litres per hour

Sales promotion on TouchScreen

Place advertising messages and ambient images on the display

Barista steam lance as fresh milk foamer

Barista steam wand to froth up fresh milk
